## Conservation Priority Poultry Breeds 2010

**Critical:** Fewer than 500 breeding birds in the United States, with five or fewer primary breeding flocks (50 birds or more), and estimated global population less than 1,000.

**Threatened:** Fewer than 1,000 breeding birds in the United States, with seven or fewer primary breeding flocks, and estimated global population less than 5,000.

**Watch:** Fewer than 5,000 breeding birds in the United States, with ten or fewer primary breeding flocks, and estimated global population less than 10,000. Also included are breeds that present genetic or numerical concerns or have a limited geographic distribution.

**Recovering:** Breeds that were once listed in another category and have exceeded Watch category numbers but are still in need of monitoring.

**Study:** Breeds that are of genetic interest but either lack definition or lack genetic or historical documentation.

Breeds unique to North America are printed in bold.

<sup>1</sup>Araucana and Ameraucanas are often confused with each other and may be sold interchangeably.

<sup>2</sup>"Heritage turkeys" is a phrase now popularly used to describe naturally mating, long-lived, slow-growing varieties of turkeys, most of which have standards defined by the American Poultry Association. All of the turkeys listed here, EXCEPT the Broad Breasted Bronze, may be called "heritage."
